

Thinking of. Building a smart utility Ask the Smart Questions

By Dirk Michiels

Smart Questions. Paperback. Book Condition: New. Paperback. 192 pages. Dimensions: 9.1in. x 6.1in. x 0.5in. The energy and utilities industry, traditionally a conservative sector, is undergoing massive change. A new type of utility is arising, and it can no longer be supported by old monolithic technologies. These smart utilities exceed their customers expectations while lowering cost to serve. Enabling the smart utility requires powerful, agile and smart business applications for meter data management and customer information systems. MECOMS on Microsoft Dynamics AX fills this void by offering a smart and integrated solution for energy and utilities. This book deliberately does not provide generic answers. Instead, it teaches you Smart Questions to consider when developing, defining or updating the implementation or application landscape. This book shows the way for any utility that wants to harness the power of being smart. This book endeavours to dig deeper into the mechanics of utilities. It all sounds so simple. And yet, with millions of customers involved, its incredibly complex. JON ARNOLD, WORLDWIDE DIRECTOR POWER AND UTILITIES AT MICROSOFT In covering the broad spectrum of processes that are now required to ensure an effective and profitable relationship between a utility and its customers, this book is...
