GEOGRAPHICAL AND INDUSTRIAL STUDIES: ASIA (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Geographical and Industrial Studies: Asia The aim of the writer has been to make the Far-Eastern continent of Asia mean more to the readers of this book than a collection of colored areas, a series of names, or a maze of dots and lines. The locating of black dots and wiggly lines with 110 mental pictures of the real places for which they stand, and the memorizing of lists of products only to forget the country to which each belongs, is the geography of the past. Modern geography is alive. The up-to-date teacher deals with real people, real industries, real places, and real relations. The uneven lines are mighty rivers filled with craft, furnishing water for irrigation, and power for lighting and manufacturing. The black dots are large cities crowded with busy workers whose lives, homes, and occupations are as real as those by which the pupils are surrounded. The world is bound together by ties of close relationship, boundaries are changing, and countries heretofore closed to outside nations are opening their doors to the great world life and are entering into commerce and trade. As the United States has reached farther and farther into the Pacific Ocean, Asia has come correspondingly nearer, and our future relations with this great continent may be as close and as vital as those which at present exist between our country and Europe.
