The need for researches with regard to this question has been emphasized by W. Thomson (Lord Kelvin), F. Exner, B. Chauveau, W. F. G. Swann, and others. Nevertheless only one fairly careful experimental investigation into the matter has been published. It was made by A. A. Daunderer, who observed the gradient at three different heights, viz. close to the ground and at a distance of 1 and 2 metres above it. Theoretic calculations of the variation of the potential gradient in the interval 0 - 10 metres have, however, been made by E. v. Schweidler, M. Behacker, W. F. G. Swann. All these authors have employed the method suggested by Sir J. J. Thomson of calculating the field between the surfaces of two condensers under certain given...
