Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1917 Excerpt: .and experience has shown that many lactating cats are remarkably tolerant toward digitalis. Such irregularities are the exception, however, and in some tests none of the figures varied by more than 2 or 3 per cent, from the average. In one of these tests the figures obtained were 108 and 109; in another 115. 116 and 119. A typical test, in which four animals were used, gave the figures 105, 116, 117 and 122 mg. per kilogram, the average of these four being Table 1 gives the results obtained with the infusions previously described. The interval during which the specimen used in a given case was kept in the ice-box TABLE 1.-- MILLIGRAMS OF DIGITALIS PER KILOGRAM OF ANIMAL 115. or incubator before being tested is expressed in days. The amount of digitalis represented in the infusion required is expressed in milligrams of digitalis per kilogram of...
